

2018 NYC Vision Line Exclusively for LCCA Members

A new 2018 Vision Line New York Central Niagara engine will soon be available exclusively to LCCA members. Lionel made the announcement at the October train show of the TCA Eastern Chapter. This state-of-the-art scale 4-8-4 steam engine and wireless tethered tender will have all of the features you have learned to expect from Lionel Vision Line trains. And some new surprises!

The LCCA #6019 Vision Line NYC Niagara will be Legacy® equipped and can be run with the Universal Remote or LionChief™ App thanks to its Bluetooth control option. And it will have safety valve steam effects, water-scoop spray from beneath the tender, three speakers located in the tender and smokebox, whistle, steam...just to name a few of the feature loaded model.

All of that and it is from Lionel and only available to LCCA members!

There are many more details yet to be announced, so keep watching the LCCA website, future issues of The Lion Roars, Interchange Track and LCCA e-blasts for more details.
