

Lionel VisionLine Challenger Only Available to Lionel® Collectors Club Members

Includes FREE Membership or Extension!

A 2019 VisionLine Union Pacific Challenger engine is Lionel's newest product offering exclusively for LCCA members. This state-of-the-art scale 4-6-6-4 steam engine and 12-wheel oil tender with wireless tethered drawbar will have all of the features you expect from Lionel VisionLine trains. And some new surprises!

The LCCA #3975 VisionLine UP Challenger represents a unique 1948 experiment when the locomotive was briefly converted to a single-stack arrangement – never before offered in O scale. Number 3975 will feature the Greyhound paint scheme, will be Legacy® equipped and can be run with the Universal Remote or LionChief™ app, thanks to its Bluetooth on board. It will have stack, whistle, dynamo and injector smoke effects from the previous VisionLine Challenger, additional sound and lighting enhancements and will run on a minimum of 0-72 track...just to name a few of the features loaded into this model.

All of that from Lionel and it is exclusively available to LCCA members! When you order this engine, your club membership will be extended one year. Not a member of the LCCA yet? If you purchase this UP Challenger, you will receive one year's membership free!

To order this LCCA exclusive, contact the club business office during regular business hours at (815) 223-0115 by end of business on October 24, 2018. Keep watching the LCCA website, future issues of The Lion Roars, Interchange Track and LCCA e-blasts for updates.
