

# Lionel UP ET44AC Diesel Honors LCCA 50th

**T**his custom Lionel UP ET44AC Diesel with next generation LioneChief® Plus 2.0 is the perfect memento for the Lionel Collectors Club of America's 50th anniversary. It carries the 2020 cab number and special LCCA 50th anniversary graphics on each side of the GE Tier 4 Union Pacific ET44AC engine.

The livery was specifically selected since the Union Pacific line runs through Omaha where the Club will hold its 50th anniversary convention, as well as Des Moines where the club was founded in 1970. This engine is being made in a limited quantity and is available only to LCCA members on a one-per-member only basis.

This very special engine includes all types of operational options including TMCC®, Bluetooth® and conventional transformer operation. You can use your CAB-1, CAB-2, LEGACY® and universal remotes. And you can download the LionChief® App on your smart device. For a full list of features, see pgs 88 and 89 in the 2020 Lionel Catalog.

This special LCCA state-of-the-art engine is available to order now and will be shipped early this fall. It can be yours for only \$399 plus \$18 shipping, but you need to call (815) 223-0115, or go to the LCCA website [Lionelcollectors.org](http://Lionelcollectors.org) to order before the limited quantity is gone.
